-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 02 May 2006.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-18 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-18 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 9/20/ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mail Date 5/30/06.
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-7, 10-13, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer et al. (GB2336577) in view of Hier et al. (US 2003/0184064).

Fischer et al. disclose an automotive visor made of a core member (52) having an outer surface. A polymeric cover layer (54), a polypropylene fabric, is integrally molded onto the outer surface of the core member (52). A support arm (14) is coupled to the core member (52) and adapted to mount the visor proximate the windshield. In reference to claim 2, the hardness of the core member (52) is relatively higher than the hardness of the cover layer (54). In reference to claims 3, 4, and 11, the core member (52) is made of a first and second halves that are hingedly coupled together to fold them into a confronting arrangement where they are secured together, as seen in Figures 1, 3, and 4. In reference to claims 5 and 12, the cover layer (54) substantially encapsulates the core member (52). In reference to claim 6, the cover layer (54) is integrally molded on selected areas of the outer surface. In reference to claim 7, since the cover layer is a polypropylene fabric, it will inherently have a texture that simulates a fabric material. In reference to claims 10, 13, and 16, the core (52) is formed of a material with a first hardness that is greater than the hardness of the cover layer (54) that is integrally molded onto the outer surface of the core (52). A support arm (14) is coupled to

the core (52) such that it may support the visor proximate a windshield. However, Fischer et al. do not disclose forming the polymeric cover layer in place onto the outer surface of the core member.

Hier et al. teach forming a cover layer in place onto the outer surface of the core member of a vehicle interior part, as disclosed in Figure 7.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the polymeric outer cover layer of Fischer et al. onto the outer surface of outer surface of the core member of Fischer et al., as taught by Hier et al., to provide a cost effective method of manufacturing and improve the aesthetics of the visor.

2. Claims 8, 9, 14, 15, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Fischer et al. (GB2336577) and Hier et al. (US 2003/0184064), in view of Binish (5,720,509).

Fischer et al., as modified, do not disclose integrally molding the mirror (46) to visor with the cover layer.

Binish teaches the molding of a mirror with the cover layer of a sun visor.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to mold a mirror with the cover layer of Fischer et al., as modified,, as taught by Binish, to securely attach the mirror to the visor and reduce the number of steps needed to make the visor.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

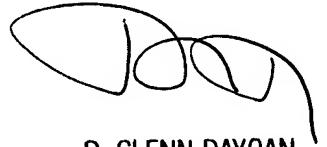

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Blankenship whose telephone number is 571-272-6656.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on 571-272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3612

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
